

# PixelPoint POS

POS Software for the Restaurant Industry

Whether you're operating a fine dining restaurant, a quick service chain or even a high volume bar, expect to increase your performance with PixelPoint POS software. Expect to enhance your performance and bottom line with a host of industry-leading capabilities, from menu screen customization to perpetual inventory management to comprehensive reporting.

Expect to improve your operation's performance and bottom line with a solution designed to be amazingly easy to use, brilliantly flexible and rock solid reliable. Empower your people to deliver outstanding service, right out-of-the-box, with fully customizable menu screens, table layouts, and screen flows. And thanks to concise screen layouts users can understand and use more aspects of the software, allowing them to make the best use of your investment.

Want simple POS functionality, sales tracking and time & attendance? Looking for more control with perpetual inventory management or better access to up-to-the-minute comprehensive reports? It's all at your fingertips with PixelPoint POS software.

Here are some highlights of PixelPoint POS':

**Remarkable Flexibility**

PixelPoint POS can be installed and excel in your establishment regardless of the concept. PixelPoint POS can easily handle table service, quick service, drive-through, delivery, catering, bars, nightclubs, stadiums, theme parks, basically anywhere you serve food and drink PixelPoint POS can help you do it more efficiently.

**Advanced Inventory**

Manage your food costs and inventory with standard and perpetual features. Accomplish everything from tracking product sales to product usage and inventory usage and easily create and receive purchase orders

**Membership & Loyalty**

Look forward to driving more business from your best customer with strong customer loyalty tools, that give you the ability to track your customers' usage, create marketing promotional programs, award rewards & manage coupons based on the products they purchase.

**Labour Management**

Expect to increase efficiency and dramatically reduce overall labour costs by controlling clock-ins and clock-outs, utilizing forecasting tools and control staffing levels.

**Credit Card Management**

Serve all transaction types, including Cash, Credit Card, Check, Gift Card Redemption and On Account for suppliers. And easily add a new payment solution as PixelPoint now supports one of the newest technologies for processing credit card and debit - contactless payments.

**Table Layout**

**Labor Forecast**

PixelPoint POS is the most reliable, flexible and easy to use POS software on the market.

Your operation must constantly adapt to meet new challenges and serve your customers better. PixelPoint POS can be easily configured to work in any POS environment as your needs change. And our software suite has been designed to work in harmony with any hardware platform and to ensure that all our applications work together seamlessly, eliminating costly product support. Most importantly, PixelPoint POS can help you deliver a rewarding experience for your patrons, as it is simply easier to train your staff on, easier for your staff to place orders quickly and accurately, and easier for your managers to accurately track & compile sales and inventory information.

### Time and Attendance

Keep your labour costs in check and increase employee performance by efficiently and effectively managing your time & attendance information. Our integrated features allow for easy schedule access unlimited shifts and multiple job positions for each employee and tie in any number of security functions to a job position.

### Reservations

No matter how demanding your environment is, our waiting list and reservations solution interacts with our table management features to ensure you can expect an easier more effective way to manage your reservations.

### Table Management

Be sure to keep your table turnover high and your customers happy with features like Customer paging, Seat Warning & Table status indicators. Plus, you'll always know what to do next because with PixelPoint's intuitive layout, all screens flow naturally and seamlessly between one other, so the next step is always obvious.

### Kiosk

With no separate software required, adding a Kiosk to your restaurant has never been so easy. PixelPoint Kiosk is designed to cut down on labor costs and speed up the ordering process, enabling a whole new level of profitability. The Kiosk will pull menu items directly from your menu database on the POS terminal, providing a seamless integration into your POS system.

### Reporting

Generate hundreds of comprehensive reports that can help you make smarter management decisions based on actionable information. Whether you need simple daily Crystal Reports or our in-depth analysis tool, DataMiner, PixelPoint POS delivers the reports you need.

### Customer Display / Order Display

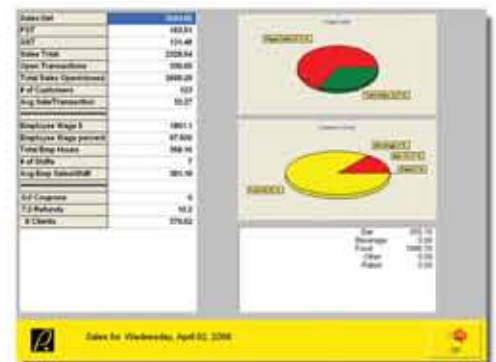

PixelPoint Supports dual-screen hardware offering a customer display that is ideal for counter service and-or quick service restaurants. Using PixelPoint's powerful Form Designer you can design your order confirmation and display screen to promote add-on products and combos when the customer reaches the counter, and have it switch to an order confirmation screen as the customer places the order, insuring order accuracy.
